MIC24085 Obsolescence

Dear Valued Customer:

We are sending you this notification to inform you that Micrel, a subsidiary of Microchip, has no choice but to discontinue the offering of the MIC24085 family including all voltage options (A/B/C/D/E/F) effective immediately. This product family was a result of a partnership between Micrel and a third-party which was recently acquired by another company.

We deeply regret to inform you that Micrel has no alternative offering for the MIC24085 family at this time but we are providing the following alternative(s) including a pin for pin replacement and ask that you contact Semtech directly or any of their authorized distributors.

- TS30013 - Semtech (pin for pin replacement)
- MP2227 – Potential replacement
- MP2207– Potential replacement
- MP9151– Potential replacement
- TPS54320– Potential replacement
- TPS56428– Potential replacement

We value your relationship with Micrel and thank you for your continuing support.

Sincerely,

A handwritten signature in black ink that reads "Richard Zelenka". The signature is written in a cursive, flowing style.
