ATTN: Quality/Purchasing Manager

**Subject:** Addition of BCB coating – Multiple part numbers

**PCN #:** PCN-01417

Dear Valued Customer:

The goal of MACOM Technology Solutions is to continually deliver high quality products and services that meet our customers' needs. We strive to offer products that are industry leading in terms of performance, delivery, safety and value.

In accordance with these goals, this communication is to inform you that MACOM is making a change to the following products:

<b>DU28120T</b>	<b>DU2860U</b>	<b>MRF141G</b>	<b>MRF151A</b>
<b>DU28120V</b>	<b>DU2880T</b>	<b>MRF148A</b>	<b>MRF151G</b>
<b>DU28200M</b>	<b>DU2880U</b>	<b>MRF150</b>	<b>MRF154</b>
<b>DU2820S</b>	<b>FH2164</b>	<b>MRF150J</b>	<b>MRF157</b>
<b>DU280SUB</b>	<b>MAPF-011002</b>	<b>MRF150MP</b>	<b>MRF157MP</b>
<b>DU2840S</b>	<b>MRF141</b>	<b>MRF151</b>	<b>MRF428</b>

A benzocyclobutene (BCB) polymer top coat is being added to the top surface of the die. This coat helps protect the active area surface from contamination and physical damage. There are no changes to design, form, fit, function, or reliability associated with this change. This change is effective immediately on Foundry work in process. There may be material in MACOM stock which will not have the BCB. Transition to 100% stock having BCB on above part numbers will occur over the coming months.

Please contact your local sales representative if you have any questions or require additional information.

Sincerely,

**Greg French**
